

Circular NPCI/2016-17/AEPS/03

10<sup>th</sup> May, 2016

To,

All Members of AEPS & eKYC

**AEPS ONUS and eKYC service using IRIS authentication in XML format**

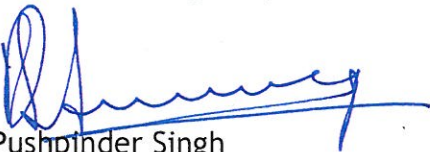

Aadhaar Enabled Payment System (AEPS) has been a game changer for promoting Aadhaar as a financial address and is playing a key role in sub serving the goal of Government of India (GoI) and Reserve bank of India (RBI) in furthering financial inclusion. Aadhaar Enabled Payment System was launched in January 2011 and has been growing ever since both in terms of number of services and transactions. Your bank is already live on various services of the AEPS ecosystem.

In line with our constant efforts to introduce new services as per the requirements of our customers we now introduce AEPS ONUS and eKYC service using **IRIS authentication in XML format**. IRIS has a higher success rate for authentication and is already available in the Aadhaar system.

We request your esteemed bank to on-board on AEPS ONUS and eKYC platform of NPCI using IRIS authentication in XML format at the earliest and assure you to extend all necessary support required for on-boarding.

For any queries regarding on-boarding kindly send an email to [aeps@npci.org.in](mailto:aeps@npci.org.in)

With Warm Regards,

Pushpinder Singh
