NPCI/2017-18/AEPS/010   18th Dec, 2017

To,
All Members of Aadhaar Enabled Payment System

Dear Sir / Madam,

Sub: XML Services and ISO Services of member banks migration to Bharath Switch

Objective: Objective of this circular is to communicate the End of AePS transaction support on existing NPCI switch and deadlines to migrate the XML & ISO services to new switch. NPCI supports AePS member banks to interface with NPCI systems using XML and ISO protocols. NPCI is migrating into new switching solution (Bharat Switch) and all the member banks were issued with a circular in the past to migrate to new solution by pointing their AePS systems to new target system in NPCI. While most of the banks have already completed this migration, few banks are still connecting on the old system.

1) **XML services migration**

   All the member banks of AePS opting XML services from NPCI on old switch are hereby intimated to migrate the services on Bharat Switch (NPCI New Switch) by 22nd December 2017, as the services on existing switch will be completely stopped by December 2017. Banks which fail to migrate the services to Bharat Switch by 22nd December 2017 will experience the decline in transactions on existing NPCI switch.
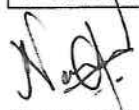

2) **ISO Services Migration**

   All the member banks of AePS opting ISO services from NPCI on old switch are here by intimated to migrate the services on Bharat Switch (NPCI New Switch) by 22nd December 2017, as the services on existing switch will be completely stopped by December 2017. Banks which fail to migrate the services to Bharat Switch by 22nd December 2017 will experience the decline in transactions on existing NPCI switch.

If you have already migrated, you can ignore this circular.
