NPCI/2018-19/AEPS/012   22nd February, 2019

To,

All the members of Aadhaar Enabled Payment System

Subject: Introduction of (i) Tokenization, and (ii) Aadhaar Seeding
status to AePS member banks

UIDAI has introduced Tokenization service for generating UID token for bank customer, the API for which has been released by NPCI in August, 2018.

Tokenization service is part of authentication transaction; hence Tokenization service will be charged as per below table.

Transaction type	Transaction code	Transaction Description	Switching Fee
AePS ONUS/Auth	16	Tokenization	

Please note that switching fee will be charged for successful transactions only.

In line with our constant efforts to introduce new services as per the requirements of our member entities, NPCI has introduced Aadhaar Seeding Status service which can be utilized by bank in assisted and non-assisted model to facilitate latest Aadhaar Seeding status to any Aadhaar holder upon his/her request. The API has been released by NPCI in January, 2019.

Transaction type	Transaction code	Transaction Description	Switching Fee
AePS ONUS/Auth	34	Aadhaar Seeding Status	Nil

With Warm Regards,

Vishal Anand Kanvaty
