Aadhaar seeding - process to be followed for obtaining consent from the customer

Refer to our circulars, on the subject, listed below

1. Circular no. 235 dated July 04 2017 on seeding of Aadhaar number to banks.
2. Circular no. 158 dated June 10, 2016 on customer consent mandatory - Aadhaar mapper mandate flag”.
3. Circular no. 80 dated Jan 07 2015 on seeding of Aadhaar number to bank accounts.
4. Circular no. 67 dated December 05, 2014 on “New mapper file format”

One of the important aspect of Aadhaar seeding is obtaining explicit consent from the customer for receiving subsidy and other credits as per the mapper data. Currently consent is obtained from the customers in two ways

1. Paper based consent
2. Electronic form

Banks are advised to note that as per the mapper design, if more than one bank uploads the Aadhaar number in NPCI mapper, the mapper will hold only the last record updated. For example, an Aadhaar number is updated by bank ‘A’ in NPCI mapper on January 15, 2017 and by Bank ‘B’ on December 02, 2017. In this case, the mapper database will show that Aadhaar number is mapped to bank ‘B’ and all the transactions will be routed to bank ‘B’ only.

In order to safeguard the interest of the beneficiaries and to prevent seeding Aadhaar no. without customer authorization, the process of obtaining consent was introduced in the year 2014. Banks should ensure to implement the following check points / validations at the time of obtaining the consent of the customer.
1. Paper based consent
   
a. Adherence to the standard format.
   
b. This should be a separate form. Banks should not include the consent text in a running booklet or application which may result in customer signing without noticing or be aware of the consent text.
   
c. There should be provision for the customer to explicitly indicate that he/she is agreeing to Aadhaar seeding to the account with the Bank. Apart from signature, the consent form should have provision for the customer to tick indicating he/she has understood the content of the form and implication of executing it.

2. Electronic form
   
a. Adherence to the standard format
   
b. Consent form should be displayed separately and authenticated separately by the customer. The seeding consent text should not be part of overall application authenticated by the customer.
   
c. The consent form should have ‘NO’ as default option, the customer should be made to tick the check box for ‘YES’.

After following the due process for obtaining consent and completing the seeding, bank should proactively communicate to customer confirming seeding and provide the masked account number in which all the future credits will be received.

Please note that any unauthorized seeding will lead to the benefits being routed to a different account than the one in which the customer is expecting to receive credits. This will cause undue inconvenience to the customers leading to complaints.

All the banks are advised take a note of the above and to ensure strict compliance of the instructions contained herein.

With warm regards,

Giridhar G M
