

NPCI/2018-19/NACH/Circular No.019

August 03, 2018

To,

All NACH Member Banks

Transport layer security (TLS) update

In order to secure all communications between NACH server and bank servers, it has been decided to restrict access for TLS and SSL versions to TLS1.2 protocol. Steps for implementation are provided in **Annexure I**.

Member banks are advised to take note and make necessary changes in their internal system with immediate effect. The access restriction will be implemented from **August 31, 2018** and with effect from that date NACH access will be available only to banks that have implemented TLS1.2 protocol.

If any further clarifications are required, the same may be raised through CRM tool provided in NACH system. (Path: NACH portal → ACH → Utilities → CRM Tracker).

With warm regards

(Giridhar G M)

SVP - NACH & CTS operations

Annexure I

Open Internet explorer → Go to “Internet Option” → Advanced tab → Security (TLS1.2 should be enabled/ticked)
