

NPCI/NFS/OC No. 207/2016-17

June 24, 2016

To

All Members of National Financial Switch (NFS)

Madam/Dear Sir,

ATMs – Security and Risk Mitigation Measures for Card Present (CP) Transactions

Please refer to RBI circular RBI/2015-2016/413 DPSS.CO.PD.No./2895/02.10.002/2015-2016 on above subject – copy attached.

As advised by RBI, it is required to ensure that all new ATMs shall necessarily be enabled for EMV Chip and PIN processing from inception i.e. Banks and White Label Operators should ensure deployment of ATMs capable of processing EMV transactions.

In this connection, we have gathered configuration pre-requisites from major OEMs for ATMs to be EMV compliant which can be used by banks for new ATMs that are being deployed. Details are given in the annexure attached herewith. You may use this information as a reference document for your future ATM deployment strategy.

Please note importantly that the information contained in the Annexure is obtained from OEMs on a best effort basis and banks have to independently discuss this aspect with the OEMs at the time of ATM deployment.

Thanking you,

Yours faithfully,

Ram Sundaresan
Head – Operations
