

PRE BID REPLIES FOR NPCI:RFQ:2013-14/0019 dated 25.09.2013-RFQ for Vulnerability Assessment Tool

| Sr. No | Page No | Clause No | Description in RFQ | Clarification Sought | NPCI Comment |
|--------|---------|---------------------------------------|--|---|------------------|
| 1 | 30 | Annexure 6 Technical Compliance Sheet | Support integration with McAfee Endpoint management system | Currently McAfee does not integrate with other VM solutions. Is this a mandatory requirement? | No change in RFQ |
| 2 | 30 | Annexure 6 Technical Compliance Sheet | The Proposed Solution should provide Countermeasure and threat correlation | Kindly explain the threat correlation function. MaxPatrol solution will provide description of the vulnerability, recommendation and also provide link to any known exploits. | No change in RFQ |
| 3 | 30 | Annexure 6 Technical Compliance Sheet | The proposed solution should reduce window of opportunity for hackers to exploit a threat via a three dimensional prioritization process | Please explain the three dimensional prioritisation process as it is not a standard. | No change in RFQ |
| 4 | 31 | Annexure 6 Technical Compliance Sheet | Facilitate deployment options that include appliance- and software-based deployment scenarios | We currently have only Software based model. Is appliance mode a mandatory requirement? | No change in RFQ |
| 5 | 32 | Annexure 6 Technical Compliance Sheet | Perform credential-based scanning on IPv6 targets | Requirements - IPV6 - General Section as well as IPV6 Scanning - Is this a mandatory requirement to scan IPV6 ranges currently or future requirement? If future requirement, please provide expected timeline. E.g:- 6 months, 1 year etc. | No change in RFQ |
| 6 | 33 | Annexure 6 Technical Compliance Sheet | Web based management console that support following browsers: Internet Explorer 8.0 & 9.0, Firefox 3.6 & 4.0 | Max Patrol server solution can be accessed using the client console software. We do not have an web based console. Hence is this a mandatory requirement? | No change in RFQ |
| 7 | 33 | Annexure 6 Technical Compliance Sheet | Allow for risk-benchmarking of business units and regions | We do not currently support this. Having said that, this can be tracked through an SIEM if available in the customer infrastructure. If this is a mandatory requirement, this feature would be made available in MaxPatrol 9 releasing in 2014. | No change in RFQ |
| 8 | 34 | Annexure 6 Technical Compliance Sheet | Certify to EAL Common Criteria and validate to FIPS-140-2 encryption | We are in progress of certification to Common Criteria and should achieve it by end of Q1 2014. FIPS140-2 we use standard windows crypto providers. | No change in RFQ |
